

● Age when 50% vegetated
 □ Current age if not vegetated (as of Year 2000)
 ▲ Planned Napa-Sonoma restorations

Notes: Red box identifies the approximate *Spartina* colonization elevation. Dashed vertical line indicates the minimum elevation for the lateral colonization of bullrush. Error bars represent the range of uncertainty based on the data available to bracket the timeframe. NAVD88 elevations are approximate.
 1- Damped tides for many years has slowed site evolution at the Slaughterhouse site.
